

BASIC PROGRAMMS:-

1. Calculate area of a rectangle. (Formula :- $L*B$)
2. Calculate area of a square. (Formula :- $L*L$)
3. Calculate area of a circle. (Formula :- $\pi*r*r$)
4. Calculate average of 5 numbers. (Formula :- $(n1+n2+n3+n4+n5)/5$)
5. Calculate Simple interest. (Formula :- $(p*r*t)/100$).
6. Take any three numbers and find their squares and cubes.
7. Write a program to enter the temperature in Fahrenheit and convert it to Celsius. $[C = ((F-32)*5)/9]$
8. Check whether number is even or odd.
9. Take a year and check whether it is leap year or not.
10. Write a program to enter two numbers and find the smallest out of them.
Use conditional operator.
11. Take a number and check whether it is zero, positive or negative.
12. Take 2 numbers and display greatest number. (Number can be equal).
13. Take age and whether it is less than 18 or not. If it is less than 18 then print not eligible for vote.
14. Write a program to check whether the blood donor is eligible or not for donating blood. The conditions laid down are as under. Use if statement.
 - Age should be above 18 year but not more than 55 year.
15. Take 2 numbers and find smallest number.
16. Write a program to find the maximum from given three numbers (Without using Nested if, or Logical Operator, Or Conditional operators).
17. Take a number check if a number is less than 100 or not. If it is less than 100 then check if it is odd or even.
18. Take a number to print the square of a number if it is less than 10.
19. Take a number and check whether it is zero, positive or negative using nested IF...ELSE statement .
20. Take 3 numbers and find greatest number using nested IF....ELSE statement.
21. Take 3 numbers and find smallest number using logical operator
22. Take a number and find factorial of that number.
23. Write a program to swap 2 numbers using third variable.
24. Take a number. Generate multiplication table of that number.

25. Take a number and calculate sum of natural numbers.
26. Take a number. If number is 1 then print Monday, 2 then print Tuesday and so on....
27. Take a number between 1 to 12. If number is 1 then print January, 2 then print February and so on... (Use switch case)
28. The ABC Insurance Company Ltd. Offers the following three categories of car insurance policy to car owners:
 - Category A, here the basic premium is calculated as 2% of the car's value.
 - Category B, here the basic premium is calculated as 3% of the car's value.
 - Category C, here the basic premium is calculated as 5% of the car's value.
29. Make a simple calculator using switch case.
 1. Addition
 2. Subtraction
 3. Multiplication
 4. Division
30. Take 5 numbers and calculate average. According to that percentage print grade.
 - If average < 50 then **Grade** is F.
 - if average ≥ 50 < 60 then **Grade** is D.
 - if average ≥ 60 < 70 then **Grade** is C.
 - if average ≥ 70 < 80 then **Grade** is B.
 - if average ≥ 80 < 90 then **Grade** is A.
 - if average ≥ 90 then **Grade** is A+
